Tuesday, 7.30 p.m., Bible study.
Friday, 7.30 p.m., Prayer meeting.

TRY OUR SOCIETY PRINTING

1941 CROW GOLF TOURNEY TO BE STAGED AT BLAIRMORE

The annual meeting of the Crows' Nest Golf Association was held at the Fernie Golf and Country Club on Monday afternoon, when Harry Blake, of Blaimore, was elected president, succeeding Lawrence Herchner, and T. J. McBride, of Kimberley, was re-elected secretary.

An invitation, to hold the 1941 tournament in Blaimore was considered favorably.

RED CROSS MARKET DAY AT LUNDBRECK

Large posters appeared early in the week, announcing a market day to be staged by the Cowley and Lundbreck branches of the Red Cross at Lundbreck on the afternoon of Wednesday, June 19th, in the Community hall, starting at 2 o'clock.

There will be for sale farm produce—cream, butter, eggs, chickens (live and dressed) and livestock. Also second-hand articles of a wide variety, excepting engagement rings. Auctioneering will be featured. There will be home-cooking, candy, ice cream and sewing booths; and tea tables where 100 per cent satisfaction is guaranteed. There will be locally manufactured gypsy girls to tell your fortune for a nickel. If you wish more than a fortune, consult more than one of these girls. You may engage, if you wish, in football, baseball or horseshoe pitching outside, but an age limit is placed at not less than four years or more than 35. It will really be the biggest attraction in Southern Alberta in the year 1940, and there will be a crowd. Mark that down, please, and bring along your old wife to trade in on a new one.

The regular meeting of Crows' Nest Chapter of the L.O.D.E. will be held at the Anglican hall on Tuesday night next at 8 o'clock. Important business. All members are urged to attend.

Little Misses Kay Lillie, Ines and Alma D'Appolonia and Master Gene Kelly took part in a musical recital in the recreation hall of Kermaria Convent at Pincher Creek on Sunday evening.

The remains of Mrs. Mary Ethel Rhodes, who died at Vancouver on May 28th, were brought to Blaimore by Sunday afternoon's train and taken in charge by A. E. Ferguson, of the Crows' Nest Funeral Home. Funeral took place Monday afternoon, with service conducted at St. Luke's Anglican church by Rev. J. R. Hague. The remains were laid to rest in the Blaimore cemetery. A large number of relatives and friends from the Lundbreck-Cowley district attended.

APPOINTED JUDGE

J. W. McDONALD

of Macleod, who has been appointed Judge of the District Court at Calgary. He was sworn in at Macleod on Monday, and will make his headquarters at Calgary.

DEATH CLAIMS WELL KNOWN COLEMAN WOMAN

Death claimed a Coleman old-timer on Tuesday afternoon in the person of Mrs. Alex. Beck, at the ripe age of 77 years.

She had been ill for a considerable period. Mrs. Beck was born near Hull, Quebec, and came west with her husband to Fernie in 1895, before the Crows' Nest line of the C.P.R. was completed. There their first son, Fernie, was born and named after the city. They later lived at Taber, taking up residence in Coleman in 1914, where they have since resided.

She is survived by her husband, two daughters and two sons. The daughters are Mrs. J. A. Barbour and Mrs. Norman MacAulay, both of Coleman; the sons, Fernie in Coleman, and William at Bellevue.

Funeral took place at Coleman yesterday afternoon, the remains being laid to rest in the union cemetery. Funeral arrangements were in charge of A. E. Ferguson, of the Crows' Nest Funeral Home, Blaimore.

A suggestion is made that the Crows' Nest Pass towns unite in subscribing towards the purchase of a Red Cross ambulance for overseas service. This is a very practical suggestion, which should be of inestimable value in the present crisis.

Sir Ernest MacMillan, principal of the Toronto Conservatory of Music and conductor of the Toronto Symphony Orchestra, states that he has not played any work by any modern German composer this year, and intends to continue excluding them.

A very nicely written story by the pen of Mrs. M. A. Page, of Hillcrest, appears in the July issue of "Your Faith," published in Chicago by Macfadden Publications, Inc., entitled "In a blizzard we cried to God." Copies may be obtained at local newstands.

Mines of this district are producing much more coal than usual for this time of the year, owing to shipments going farther east than for many years. It is said the increased eastern demand for Canadian coal has resulted from the marked premium on U.S. money.

Bill Prentice, of Fernie, won the men's championship at the Crows' Nest Pass Golf Association's 19th annual tournament at Fernie, defeating Hughes 6-5. Miss Ellen Hughes, of Fernie, won her eighth ladies' championship and her sixth in a row by defeating Mrs. Fergie, of Cranbrook, 3-2.

Editor Barrett, of the Western Star, Newfoundland, has a large family of sons and daughters. As the daughters were largely in the majority, he has already given several of them away. Mr. Barrett will attend the annual convention of the Canadian Weekly Newspapers' Association at Calgary in July.

BLAIRMORE RED CROSS NOTES

The National Council of the Canadian Red Cross Society is sending out appeals to all local branches to increase the shipments of Red Cross supplies of all kinds. The ladies of Blaimore are making every effort to satisfy this demand, but they need more workers and more supplies of raw material. They hope to be able to get the use of the four sewing machines from the Blaimore School Board for the summer vacation period, and while it was the original intention to close the work rooms for the summer, the increased demand for supplies will make this impossible. There must be a few more ladies who are not yet working for the different war organizations, and appeal is made to them to come along and "DO THEIR BIT." The situation in Europe is so well known that we do not need to repeat any details; but when we consider the suffering of the soldiers and refugees, we must agree that here in Canada we are not yet doing our share.

A subscription committee has been hard at work all week amongst the employees of the Greenhill mine, and the response so far has been splendid. We want to see every man employed at the mine giving his regular donations to this worthy cause. Other citizens of the town can leave their donations with F. M. Thompson Co., at the main store, or at the Blaimore Pharmacy, or hand them direct to the local treasurer, Mrs. Grainger. Official receipts will be given for all donations.

One local citizen hit on a new idea to help the Red Cross. He passed the hat at a party held in his home, and the result was a very nice contribution to the funds. This idea is passed along to our people for what it is worth.

Give until it hurts, but don't let it hurt too easily. Many of the citizens of The Pass are contributing to the various war charities in a splendid manner, and their actions are highly appreciated; but we must always remember that our contributions appear very insignificant when compared with the sacrifices which are being made daily by the people of Europe and Great Britain.

A demand has been issued for fifty standard Canadian ambulances, fully equipped, for use in war-torn Europe, and the response has been splendid so far. At a luncheon held by the Calgary Rotary Club on Wednesday, donations for well over \$2,000 were received in five minutes from the business men present to purchase one complete ambulance. The suggestion is tendered here that the citizens of the Crows' Nest Pass get together and put on a "bleitkreig" campaign in the towns of Coleman, Blaimore, Frank, Bellevue, Maple Leaf and Hillcrest, and donate one fully equipped ambulance at a cost of \$2,070, same to carry a plaque on the side "Donated by the Citizens of the Crows' Nest Pass." This suggestion has been passed around the different towns, and has been well received. It would appear that all that is required now is some kind of organization to start the ball rolling. Let us dig down deep into your pockets and put this splendid idea across in the shortest possible time. The ambulances are needed NOW, so let's all get together and do a little bit more for the soldiers on the battlefields.

Save by buying War Savings Certificates and Stamps.

A general meeting of the Blaimore Community Sports Association was held in the town hall last night, when tenders were received for the erection of new bleachers at the sports ground, and contract awarded, the work to proceed immediately in readiness for the big annual sports day on July 1st.

BELLEVUE HAPPENINGS

Miss Olive Goodwin, who spent the past month with her parents here, Mr. and Mrs. Watts Goodwin, returned to her duties at Vancouver.

Mrs. Fred Wolstenholme is visiting at Soap Lake, Washington, where she is receiving medical treatment.

Mrs. H. Meade, Mrs. D. Young and Mrs. Charles Emmerson left Tuesday to attend the Grand Chapter of the O.E.S. of Alberta at Lethbridge.

Miss Lily Padgett, who has been attending the Calgary School of Technology and Art, is home on holiday.

Mr. and Mrs. William Christie and children, of Lethbridge, spent the week end with Mr. and Mrs. E. W. Christie here.

Mr. and Mrs. William Prescott left Saturday on a two weeks' vacation.

The new pups for the United Church have arrived and are being installed.

Mr. and Mrs. H. Smith are on a two weeks' holiday.

The Women's Auxiliary of the B. E. S. L. held a farewell party on Tuesday evening in honor of one of their departing members, Mrs. S. McLean, who leaves shortly to take up residence in Trail.

Mrs. Albert Goodwin and daughter Joan left last week on an extended holiday to be spent in Hamilton, Ontario.

Simon Ruymaeker is working in Macleod.

Mr. and Mrs. G. W. Barnett have moved into the house recently vacated by Mrs. Beal, senior.

An order issued Saturday by the Alberta board of industrial relations states full-time female employees in restaurants and cafes in Alberta are to receive not less than \$12.50 for a normal working week. The order also provides the period for female apprentices shall be reduced from six to three months, receiving \$9 a week for the first month, \$10 a week for the second month and \$11 a week for the third month, and advancing to the \$12.50 minimum thereafter. A new section of the order prevents employers from making deductions for uniforms or any special article of wearing apparel. Now employers will be required to supply such uniforms, provide for repairs and laundry costs.

PATRIOTISM AND COAL

Not long ago I listened to Admiral Sir Howard Killy addressing an audience in Halifax about the opportunities for Commonwealth patriotism. A point on which he laid special emphasis was the service we could render by buying British-made goods. There is so much that Great Britain must import from the United States, and our dollars, obtained in exchange for her goods, can go so far in payment! But there is surely an application of this excellent moral for us nearer home. What about the enormous and unnecessary expenditure of Canadian money on United States coal—so strange a proceeding at all times, but specially strange now, when Canadian coal mines are left so largely unworked for want of the orders which we continue to place abroad? We, too, have need to realize how our volume of indebtedness to our great neighbor must rise very fast as this war goes on, so that the unfavorable trade balance—due to our need of war material—must somehow be kept within manageable dimensions. Why on earth should we not now reduce it by a measure long urged on other grounds, and which these special circumstances of war-time indicate as imperative?

Recent coal statistics for Canada are both eloquent and startling. They indicate that the Nova Scotia mines could and would produce, if orders were available, at least 30% more, and Alberta mines at least 40% more than they are producing now. We shall hear at once the objection that the shortage of such orders is due to the relative unsuitability of the Canadian product for our home and factory purposes: "Blessed be anthracite!" There is point in the protest; for some purposes, anthracite is plainly preferable, and I am not extolling Canadian coal as always and everywhere equal to the best even of its own kind. The strength of the plea I am putting forward, both on local and on imperial grounds, needs no support from exaggeration. But neither can one expect patience with the exaggerations put forward against it.

Not anthracite alone is being imported into this country, which could at any time, and certainly should in war time, produce all the bituminous coal it requires. What about nearly ten million tons of the fuel our own mines can so easily and so satisfactorily supply, that we saw imported into Canada during 1939? What of the 400,000 tons of American coke consumed last year in the province of Ontario alone? The experiment tried in Winnipeg during the first World War, when United States coal was difficult to procure, and recourse was had very reluctantly to the home product, proved such a success that, in a city whose winter climate is far more exacting than that of any in central Canada, multitudes had never returned to the foreign import in over twenty years. Cannot we learn from experience, at least from war to war? Or must we repeat the same costly failures, in deference to the same long-discredited rhetoric? In this legend about United States coal, as not merely preferable for certain uses, but as indispensable on the huge scale on which we have formed the habit of buying it, our simplicity has been a disgrace. After so clear a trial we should reflect again, with Browning, how "Fancy strikes fact and explodes in full."

What are we thinking of, if we continue this wastage at such a time as the present? It was bad enough in relatively quiet years to send so much money out of Canada, for a benefit in great measure illusory; it meant that we had to provide a livelihood in idleness for large bodies of miners who, but for our habit of thus buying abroad, would have been sustaining themselves by their own labor. But it is many times worse now, when there is so much that we cannot produce at home to meet our war needs, so much for which we are bound to draw upon United States manufacturers, and for which we must pay in such American dollars as are obtainable only at high discount in ex-

LOCAL AND GENERAL ITEMS

Save by buying War Savings Certificates and Stamps.

Blackmore asked the federal parliament to devote a portion of its time to the study of the scriptures.

Mussolini is busy now equipping himself with parachutes and slinkers, with which to come down off the fence.

Twenty years ago, Cowley was planning on irrigating 20,000 acres of farm lands from water supply at the Gap.

Blankets are badly needed for war refugees. All donors please get in touch with the local Red Cross Society at once.

Mrs. Sexsmith, of Trail, has been visiting here with her aunt, Mrs. Battel. She is accompanied by her two children.

The regular monthly meeting of the local branch of the Red Cross Society will be held in the central school tonight at 8 o'clock.

Miss Grace Allison, R.N., and her sister, Mrs. Langford, R.N., of Los Angeles, have been visiting with relatives and friends in Pincher Creek.

Referring to improvements being effected to the front offices of Pincher Creek Motors, the Echo remarks that the speaker's chair remains in the same place.

Miss Mabel Thompson, R.N., of Vancouver, is visiting her parents here, having flown from the coast to Lethbridge, catching the Greyhound bus for Blairmore.

The marriage of Miss Myra Helen Wood, daughter of Mr. and Mrs. William Wood, to Mr. Alva Erskine Blais, took place at Lethbridge on Wednesday evening.

"I wonder if I could borrow your carpet sweeper, Mrs. Smith?"

"I'm sorry, but he joined up last week."

The annual convention of the British Columbia School Trustees' Association will be held at Nelson September 23-24-25.

Golfer: "You must be the worst caddy in the world."

Caddy: "Hardly, sir. That would be too much of a coincidence."

Local Teacher: "What do you mean by saying Benedict Arnold was a janitor?"

Willie: "The book says he lived in a basement the rest of his life."

Local Teacher: "Why, Mary, that's a queer pair of stockings you have on—one green and one brown."

Mary: "Yes, teacher, and I've got another pair like them at home."

Man in Elevator: "Fourth floor, please?"

Operator: "Here you are, son."

Passenger: "How dare you call me son? You're not my father!"

Operator: "Well, I brought you up, didn't I?"

The inebriate was staggering along the sidewalk when a cop on beat asked him what he was doing. "Believe it or not, I'm looking for a parking space," answered the one under influence. "But you haven't an automobile," said the bobby. "Oh, yes I have; it's in the parking space I'm hunting for!"

change for our own. We cannot too soon bethink ourselves of how to maintain a tolerable balance of trade, and each practicable reduction of imports makes the task easier. Coal is our most obvious product on which to become, as the Germans in their Four-Year Plan say, "self-sufficient." To learn from a resourceful enemy is a valuable practice, especially during war.—Dr. H. L. Stewart, in National Home Monthly

THE WEEK IN EDMONTON

Edmonton, June 3.—Alberta stands at the threshold of the greatest tourist year in her history. In cities, towns, mountains and lake resorts, preparations are almost completed for the welcoming, service and pleasing of a huge influx of cash customers whose dollars are to Canada what bombs, planes and shells are to the fighting men overseas.

These points are stressed because of misguided criticism which the Dominion and Provincial governments are trying to offset. The criticism deals with the fancied dangers of tourists as an entree for fifth columnists. It is bad patriotism, because it does not take into account several factors. These are (1) that the Royal Canadian Mounted Police is still as efficient as ever; (2) that fifth columnists hoping to reach Canada will hardly wait for tourist advertising to tempt them; (3) that, opposition to the Canadian tourist trade is exactly in line with the efforts of Nazi agents in U.S.; that Canada vitally needs American dollars. The tourist dollar is the best dollar of all.

As is well known, Canada and the Mother Country are doing extensive cash-and-carry war business with the United States. The search for cash is centered largely in the tourist trade. Last year American tourists left \$362,000,000 in Canada. This year it is hoped to induce them to leave \$300,000,000. In normal years, Americans spend half a million dollars on holidays abroad. This year Canada is "abroad"—European and Near Eastern traffic being stopped. Should Americans leave in Canada this year the amount anticipated; they will have swelled Canada's coffers by half as much again as her entire production of gold.

It has been estimated, too, that for each 5.5 incoming tourist, one Canadian is gainfully employed by their spending during the length of their stay. The American Hotel Association declares that the tourist's dollar is broken down as follows: retailers 31 cents, hotel 25 cents, restaurant 18 cents, garage 10 cents, theatres 8 cents, miscellaneous 12 cents. That is a pretty broad spread over the community.

Last year the American tourists brought us money to buy all the iron and steel products we purchased from that country—with a hundred millions to spare. While the war has greatly enhanced this buying, it is nevertheless true that once again they will help us to help the Mother Country and the boys overseas. Various agents south of the border recognize this. They have been at great pains to put Canada in disrepute as a vacation land. The Dominion government has been at great pains to dispel all doubts. The Provincial government has a representative at present in the U.S. swatting rumors and creating goodwill.

All of which points to the need for greater, not grunter, in Canada. If Canada is to become the arsenal of the allies, as an executive of the Foreign Exchange Board says: "England will depend on Canada for foodstuffs, metals and other commodities. We must see that we have foreign exchange to pay for all these imports. Tourist income will stabilize the Canada-U.S. trade balance." Alberta enjoyed a record \$5,000,000 tourist trade in 1939. Common sense and neighborly handling of the visitors, with faith in the defence of Canada, can easily swell that to \$9,000,000 in the current year. It can be swelled further by Canadians holidaying at home, too. The wartime slogan is: "Keep Canada's Cash in Canada—It's Patriotic to Holiday at Home."

A Newfoundland hospital is calling for tenders for the supplying of 20 gallons of milk per day June 1 to November 30, 15 gallons per day December 1 to May 31, 1200 dozen prime fresh eggs within one year, 200 barrels (160 lbs) potatoes, 100 barrels turnips, 20 barrels carrots, 20 barrels beets, 20 barrels parsnips and 1000 pounds lettuce.

MODERN MARRIAGES

Why is it that we so often read of the "blushing" bride? It's the groom who should blush, for he's the guy that fell.

Only recently a novel lawn marriage took place in a central Alberta town, with the following ceremony by the parties participating:

"Friends, Romans, Countrymen: I come to marry you—not to bury you. You must realize now what you are entering upon. Take one more look at one another while you are still unattached.

"You, Jemima, will have to be prepared to take over full control of everything, and be master of all, including your husband.

"You, Ferdinand, will have to be prepared to take and obey all orders from your better half, meekly submitting to any test.

"Do you, Jemima, take this wolf in sheep's clothing to be your servant, to boss and to bully for all time?"

"Do you, Ferdinand, take this apparition, this human dreadnaught, to boss and control you for the rest of your days?"

Upon these questions being answered in the affirmative, the bridegroom gave the bride a beautiful paragon ring of celluloid. After the ceremony, the bride and groom returned to their respective homes, where they will reside—both blushing.

Charles Carswell, Pincher Creek solicitor, and J. L. Fawcett, K.C., of Macleod, attended a district court sitting here on Wednesday presided over by Judge A. M. MacDonald.

The wholesale firm of Campbell, Wilson & Horne, Limited, will apply to the registrar of companies for the Province of Alberta for a change of name to Horne & Pitfield Limited.

Miss Martha Webber, of Ottawa, has sent a cheque for \$100 to the minister of finance, with the notation: "If it will send one plane faster to the battlefield, it will ease the feeling of being only an onlooker at the agony of our brothers."

The Macleod Catholic youth organization entertained some 500 guests from Coleman, Blairmore, Bellevue, Hillcrest, Granum and Lethbridge on May 31st, when a splendid musical programme was rendered, followed by a dance.

Albert Crowder left for Calgary yesterday, where he hopes to be recruited with the air force. Morris Thorpe, a Blairmore boy, joined a group from Calgary on Wednesday, enroute to training headquarters near Toronto.

GROWN IN SUNNY SOUTHERN ONTARIO

The Mighty Atom

One can imagine with what dismay producers of power of all kinds and from all sources must have read the recent announcement from New York of the isolation in a laboratory workshop of a new chemical substance, one pound of which, to quote newspaper despatches, "is said to be capable of yielding the power output of 5,000,000 pounds of coal or 3,000,000 gallons of gasoline."

Significant, indeed, of the potential destructive power and the use to which it might be put by the Germans, if the perfect it, is the name which has been given it—the "U-235." If that were not sufficient to arouse dread, the New York Times, which first announced the discovery, declared that the German government was aware of the research in this field being carried on in the United States and has instructed all its greatest scientists to concentrate on the problem of improving the process, "one pound of which is stated to have the explosive force of 15,000 tons of TNT." The German scientists in this field have been told to drop all other work and devote themselves to this task alone, says the New York paper.

Simple, too, is the method of application of U-235 to the process of developing power. All that is necessary is to immerse some of the new isotope in cool water when it will release energy in the form of steam. The process is akin to the generation of acetylene gas. As long as water makes contact with U-235 it will develop steam and all that is necessary to stop it is to cut off the supply of water.

For Good Or Evil

While the substance, U-235 has been discovered for some time, it is only quite recently that scientists became aware of its immense possibilities for good or evil, according to the purpose to which it may be put. As the story goes, it was in February that a professor in the University of Minnesota, was successful in isolating "a minute fraction of a gram" and subsequently a professor at the University of Columbia subjected it to tests with an atom smashing machine. Since then the yield has been increased 200-fold, indicative of possibilities that a process for isolating the substance in large quantities may soon be found.

The immense commercial and industrial as well as a warfare potentialities of the U-235 can be sensed from the statement that five to ten pounds of the substance, plentifully available in many parts of the earth, is capable of driving a battleship or a passenger liner around the oceans "for an indefinite period without refueling."

While the destructive use of such a substance as U-235, when used as a weapon of war would be no terror as to begar description and its incalculable effects are almost beyond the imagination of man, its use in the arts of peace would be so beneficial to mankind as to be revolutionary. It is true that if a process can be discovered which will enable the substance to be isolated in large quantities and cheaply, it would ruin many industries and destroy an enormous amount of capital invested in such industries as coal and petroleum. On the other hand it would make available to man a cheap source of power, almost akin to perpetual motion.

Applied to peace time pursuits one can visualize a family setting out for a trip around the world in a steam driven automobile with a full supply of power for the entire trip in something less than a pound package in the trunk or under the back seat of the car. All that would be necessary to keep moving would be to occasionally renew a small tank of water at ordinary temperature. Done would be the necessity of stopping every 200 or 300 miles to instruct a gasoline station attendant to "fill 'er up".

Might Destroy Civilization

But when and if such a force, if available in quantity, were applied to the work of destruction as exemplified in the kind of warfare being waged by Germany against the Allies, the results would be too terrible to contemplate. They might be expected to rival the off-relied but mythical death ray.

In view of the ruthlessness of the Hitlerian method of conducting war on mass scale against open cities, and the German policy of slaughtering innocent women and children, on wholesale scale, and of wiping out densely populated civilian areas by the square mile, it is not surprising to hear that the German military machine is interesting itself in the new discovery and that the scientists that it has been ordered to drop everything else in the interest of further development of U-235.

In the interests of humanity and of the very existence of civilization it is to be devoutly hoped that the development of U-235 as a practical and feasible source of power will be stayed until the Allied arms have prevailed and the world has once again been made safe for the peace-loving nations of the globe.

God forbid that the mighty atom should be used to destroy democracy.

Bacteriological Research

Bacteriological research in the general field of agriculture and the related industries is now having many important applications. Bacteriology was developed first in connection with human medicine, and, in spite of the fact that out of the hundreds of species of bacteria known to science only a very few are recognized as causing disease, bacteriology is still connected in the lay of the Canadian flora—Dr. J. M. Swaine, Director, Science Service, Dominion Department of Agriculture.

Although the feathers of silkies may be either white or black, their skin always is black. They are the Negroes among fowl.

Remains of an aqueduct built by the Roman Emperor Claudius have been found by workmen near Naples.

Intercept Nazi Messages

While mail of suspicious character is continually subjected to close scrutiny by censors stationed in Canada's two internment camps, a new twist in Nazi methods was discovered recently at Kananaskis Camp, in Alberta, where post-card messages, sent from Chicago, were intercepted. These three type-written cards carried no signature and bore only verses in German and English prophesying Nazi victory and domination of Canada and the United States.

Two Good Deeds

When young Roland joined the Boy Scouts he thought, he'd go one better than the others and do two good deeds a day.

So he had a look round to see what he could do.

First, he found a little mouse squeaking in the mousetrap and he took it out.

Good deed No. 1.

Then he found the cat was hungry, so he gave it the mouse.

Good deed No. 2.

Despite war, students of 14 nations are studying at the Sorbonne, University of Paris, including English, Canadians, Turks, Chinese, Hindus, Yugoslavs and Brazilians.

The amount of water that air can hold is dependent upon its pressure and temperature.

Does Not Use Them

Germany Has Never Made Anything Out Of Her Colonies

The idea of a poverty-stricken and over-populated Germany was opposed by Dr. E. G. Pleva, geographer of the University of Western Ontario, when he spoke at a dinner meeting of the Lions Club at Stratford, Ont. Dr. Pleva declared that a myth had grown up that Germany was over-populated. It was not a question of the number of people to the square mile, but a matter of how many people to the square mile that a country could support. Germany, with a population of 566 to the square mile, had stressed the over-population claim so long and steadily that it had come to be an accepted fact. But despite claims, they moved to take over two countries, Holland and Belgium, that were about twice as densely populated.

After asking whether Germany ever thought of Canada, the speaker declared that one of the best surveys ever made of Southwestern Ontario was made in 1832 by a German geographer from the University of Kiel, and he doubted that it was a coincidence that this same geographer turned out afterwards to be a high ranking official in the German army. The idea that the Germans were good colonizers had been exploded. They did not do anything with their colonies when they had them. German immigrants did not go to German colonies. Figures had shown that an average of some 35 persons, that is, eight or nine families a year had emigrated from Germany to her colonies.

SELECTED RECIPES

MAKE IT BRANBURGER

Like a guard of honor, trusty branburgers are ready to do their duty the picnic picnic. Each one is bound in its own strip of bacon, skewered and wrapped in gay wax paper. Every thing done but the cooking—and what better place to do that than right "on the spot." Cooked over the open fire, "Burgers" take first place in appetite satisfaction after a day's outing—and the bran count sets a new high in taste delight and economy. That jar in the lunch basket contains the Spanish Sauce. It will add a continental flavor to your branburgers.

Branburgers

1 egg
1 1/2 teaspoons salt
1 1/2 teaspoon pepper
1 1/2 cup milk
1 cup all-bran
1 lb. ground round steak
2 tablespoons finely Spanish sauce
1 tablespoon chopped parsley
20 slices bacon
Beat egg and add salt, pepper, milk and all-bran. Combine mix with onion and parsley. Add the soaked bran and mix thoroughly to cakes about two inches in diameter and one inch thick. Wrap slice of bacon around each cake. Skewer with skewer. Bake in hot oven (450 degrees F.) for 30 minutes or broil for 20 minutes. Serve with Spanish sauce. Yield: Five servings.
Note: Half cup grated cheese may be sprinkled over top of Branburgers before the last ten minutes of cooking.

Spanish Sauce

1 1/2 cups sliced onion
3 tablespoons fat
1 cup chopped green pepper
2 cups canned tomatoes
1 1/2 teaspoons salt
1 1/2 teaspoon pepper
2 teaspoons Worcestershire sauce
1 cup stuffed whole olives
Brown onions lightly in the fat. Add green pepper, tomatoes and seasonings. Simmer until mixture thickens, stir in olives and heat thoroughly. Yield: Three cups sauce.

Idea Under Consideration

Manitoba Government Plans Trapping Of Muskrats To Help Industry

Trapping of a million and a half muskrats annually in the Saskatchewan River delta area may be made possible by a 10-year program of development under consideration by the Manitoba government.

Premier John Bracken states that such an industry would provide a payroll for the community adjacent to the Fox exceeding \$2,000,000 a year. "Five years ago there were practically no muskrats in this area. It is now estimated that as a result of the conservation work done, the rat population before present trapping started was 300,000," states Mr. Bracken.

Was Once A Joke

How Process Of Inside Frosting Of Electric Light Bulbs Started

The Christian Science Monitor carries an interesting story on how the process of frosting electric light bulbs on the inside was discovered. The problem was a "rag" piece of research assigned new apprentices in one of the electrical equipment company. One researcher failed to realize that he was being kidded, and turned up with a process which not only did the trick but added materially to the finished bulb's strength.

CORN SYRUP

An Ingenious Pilot

Used Chewing Gum To Repair Holes In Airplane Engine

How a flight lieutenant patched two bullet holes in his engine with chewing gum after being forced down by six German fighters, and got back to his command, was told by the British air ministry.

The aviator was attacked, said the statement, over eastern Belgium in the early days of the German push, and landed in a field.

With the help of peasants, he covered the plane with branches to camouflage it, and German bombers passed over without spotting him. His plane was undamaged except for two small holes in the engine. At the nearest town he bought gasoline and a package of chewing gum.

"I chewed that gum for a bit to get it tacky and then plugged the holes," he said. "It set very well, I got oil and petrol put in, took off, and so came home."

Not Affected By Change

Saluted Cat At No. 10 Downing Street Says On

When Mr. and Mrs. Neville Chamberlain, after three years' residence at No. 10 Downing street, moved out to make way for Prime Minister Winston Churchill, they took the family bird bath along with them.

Promoted from Chancellor of the Exchequer to Premier, in May, 1937, Chamberlain made sure that the bath followed him from No. 11 Downing street, traditional home of the treasury chief, to the garden of No. 10. It has now been moved to a private house, since Chamberlain, as Lord President of the Privy Council, does not rate an official residence.

Bob, the salaried Downing street cat, who can claim as direct ancestor an animal owned by Cardinal Wolsey, is not affected by the cabinet shake-up.

New York City's population has multiplied 150 times since 1790. The population of the United States, as a whole, has multiplied only 32 times in the same period.

Vast Picture Crowds

Movie Audiences In United States Now Into Millions

Wondering at the size of motion-picture audiences at this late day is almost like trying to decide whether the automobile has a place in modern life. Nevertheless, there is a little for the imagination, in the thought of something like 800,000 persons witnessing the same scene play in a single theatre in the space of six weeks, even if the theatre is the largest of its kind in the largest city in the United States.

Something between eighty million and ninety million people go every week to the pictures in this country. In the course of six weeks this means half a billion patrons, about four times the present population of the country, a truly stupendous figure. But for a moment the specific number of 20,000 people a day, after day for six weeks in a single theatre, is actually the more impressive.

—New York Times.

Had Something To Say

Pompos Orator Had Great Opinion Of His Radio Address

Malcolm W. Bingham, in the Detroit Free Press, said years ago, when the radio was young, there was one of these civic outbursts of some kind in Detroit. A pompous orator of the old school was scheduled to make the speech of the day. He was all a "writer" because "it was to be a broadcast. He asked me, 'I would read his address to make sure that it was of the type that would go over the air. I did not have to read it, all I had to do was hear it. He had written a volume. "This, my dear sir," I told him, "would take an hour to read even if it were cut in half. And you have only 15 minutes before the microphone."

He was stunned. "I can't," he insisted, "reduce this down to 15 minutes."

"Lincoln took only 110 words for his Gettysburg Address," I reminded him.

"I know that," he spluttered, "but then, damn it all, don't you see, I have something to say!"

Old-Fashioned Spelling Bee

Was Good Discipline With Plenty Of Fun Thrown In

The Guelph, Ont., Mercury, says: It is probably true that our grandparents were better spellers than we are. They were drilled in the old-fashioned way, being obliged to stand up and spell before the whole school. "Headmarks" in spelling classes counted those days, and if a boy or girl spelt "hemorrhage" with one "r" the chances were they never forgot that it was not the way to spell it. The old-fashioned spelling bee has much to commend it. It is good discipline with a lot of fun to boot.

New Plane Detector

A secret, super-sensitive airplane detector which pierces all fog and darkness to give defending fighters a vital, 15-minute warning of approaching enemy aircraft has been perfected by the United States army for a chain of coastal lookout stations.

THE COLEMAN CO. LTD. & STOVE CO. LTD., TORONTO, CANADA (2227)

Record Gypsum Production

Deposits Are Found In Many Sections Of Canada

Gypsum production in Canada set an all-time tonnage record in 1939, when the output amounted to 1,408,188 tons valued at \$1,922,957 as against 1,008,799 tons valued at \$1,202,265 in 1938, according to the Department of Mines and Resources, Ottawa.

Canada ranked fifth among the world's gypsum producers during 1939, contributing 8 per cent of the world production and 38 per cent of that of the British Empire. The Dominion is fortunate in having extensive deposits of excellent grade gypsum, favourably situated for commercial exploitation. Nova Scotia is the largest producer, and is followed by Ontario, New Brunswick, Manitoba, and British Columbia. The materials produced are the hydrous calcium sulphate, commonly known as gypsum; the partly dehydrated material known as plaster of Paris, or wall plaster, and the anhydrous calcium sulphate known as anhydrite.

Prior to 1937 the Canadian production of anhydrite was exported principally for use as a fertilizer for the peanut crop in the Atlantic seaboard states of the southern United States, but there has since been an increasing market for this material in England, where it is used for the manufacture of sulphuric acid, ammonium sulphate, cement and special plasters. Owing to the war, overseas shipments have been curtailed, but it is possible that an industry will be started in Canada in which anhydrite will be used in the manufacture of products similar to those being marketed in England.

The use of gypsum products in the building trades has made rapid progress in recent years because of their lightness, durability, fire-resisting, insulating and acoustic properties. Tiles, wallboards, block, and special insulating and acoustic plasters have been developed.

Efficiency experts say that happy staffs do more and better work than those working under bullying or nagging supervisors. Nearly half of the working time of unhappy staffs is wasted, they claim.

England imports more eggs than the rest of the world combined. Its main sources of supply are Australia, China, Denmark, Ireland and the Netherlands.

BRITISH TROOPS REACH ENGLAND AFTER EPIC FIGHT

London. — Thousands upon thousands of soldiers, grimy and exhausted, many of them wounded, returned proudly to Britain after an epic fight for 20 days in Belgium and northern France.

They came back in warships, transports and hospital ships.

The Royal navy paid for the evacuation with the loss of several small craft, but protected the great bulk of the soldiers against vicious attacks by the German air force.

Side by side with the navy, the Royal Air Force fought desperately throughout the day, adding to its exploits when 77 German planes were shot down by British fighters in covering the retreat in Flanders.

Singing and shouting, members of crack British regiments piled into buses and trains. Then their weariness overtook them. Many put their heads back on cushions and slept.

All ranks said the Germans took a terrific pounding and lost severely in manpower for which they had to show only gains in territory. British supplies left behind were destroyed.

All ranks also declared that the R.A.F. showed "marked superiority" man for man, plane for plane.

The admiralty announced the loss of the destroyers Grafton, Wakeful and Grenade, a small transport and various auxiliary ships in connection with the withdrawal.

Powder grimed and blood stained, veterans of the desperate campaign in Belgium and northern France told in tired voices of "terrible losses inflicted upon the Germans."

Loaded down with full equipment, shipboard after shipload of soldiers arrived along the southeast coast. Police and troops kept crowds from the piers but coast dwellers got near enough to the disembarking warriors to give them a cheer.

The soldiers were singing, shouting and waving when they came ashore but for the most part they took their places in trains and motorbuses they slumped into their seats, obviously worn out.

Unshaven and with uniforms stained, they were a battle-weary lot. Typical was a heavy fellow with several days' beard. With a weary grin he said:

"We have had a terrible time this last fortnight swimming canals, nights without sleep and bombing attacks. Fifty or more fellows would come over and drop their bombs. Just as we were recovering, would come 50 or more, and so on in relays."

The Tommies were not too tired to lean out of train windows and wave "thumbs up" to the crowds on station platforms.

All ranks told also of the urgent need for more aircraft to support land troops.

A veteran of the last war said the German advance was accomplished "by sheer weight of numbers."

"The British put up a barrage a mile long to stem the advance," he said. "I fought in the last war but I never saw anything like it. The Germans advanced right into it, disregarding human life. Their casualties would have been tremendous."

Another soldier said fleeing refugees hampered the movements of Allied troops throughout. He added "the Germans drove tanks right over them, caring nothing for men, women or children. It was mass murder in the first degree."

Soldiers said that throughout the embarkation they were machine-gunned and bombed from the air. Many were still wet from swimming to the ships and wading to boats.

Naval crews who brought them to England were as tired as the troops and had to be relieved on arrival. Some French troops were among those landed.

Facilitate Plane Production

Britain Turns Over Patents On Airplane Engines To U.S.

Washington. — Britain turned the patents on its prize airplane engine over to the United States to facilitate production for the American and Allied air fleets.

The announcement was made by Dr. George Jackson Mead, aircraft adviser to Treasury Secretary Henry Morgenthau.

Mead said the British gave the United States government full rights to use in any desired manner the patents to its famed "Merlin"—12 cylinder, liquid-cooled Rolls-Royce—the same engine powering British "Defiants," "Spitfires," "Hurricanes" and other speedy ships.

Canadian Squadron

Second Air Force Contingent Arrives In United Kingdom

Ottawa.—The second Royal Canadian Air Force contingent to be sent abroad, an advance party of No. 112 (City of Winnipeg) army co-operation squadron, has arrived safely in the United Kingdom, Air Minister Power announced.

No. 112 will act as a reserve for No. 110 (City of Toronto) army co-operation squadron, which went overseas in February. Duties of the squadron are to act as the eyes of ground forces for reconnaissance and scouting work, bombing and ground strafing.

Few witnesses saw the men of No. 112 depart from Ottawa under the leadership of Squadron Leader W. F. Hanna of Winnipeg. It was another Winnipegger, Squadron Leader William Van Vleet, who led No. 110 out of Ottawa for overseas duty.

Wing Commander F. V. Beamesh of the Royal Air Force actually was in charge of No. 112 party during the voyage, as he was the senior officer aboard their ship.

"The wing commander holds a commission in the R.A.F., but has been attached to the R.C.A.F. for some months assisting in organization of the British Commonwealth air training plan. The major party of this contribution to the training plan organization had been completed and the British air ministry recalled him."

"On you depend much of the success or failure of your squadron," he told the airmen of the squadron after they had assembled aboard their ship at an east coast port.

"Aircraft must be tuned for flight and when in the air must not be forced down through some mechanical failure—that might have been eliminated by exercise of adequate attention on the ground."

Newspaper Sales Up

Circulation Figures Have Increased Greatly Since Outbreak Of War

Regina.—Progress of the war in Europe has been accompanied by a general increase in newspaper sales across Canada, according to a survey of circulation trends since the conflict started last September.

But upswing in sales has been accompanied by increased costs to newspapers—general coverage of the war, including cable services from war zones, and general production costs. Papers for The Canadian Press from coast to coast reports sharp rises in circulation figures.

Especially since early in May when Germany invaded the low countries and opened "total war."

Home deliveries have increased less spectacularly than sky-rocketing street sales, but show rises of around five to 15 per cent. in individual cases.

Headquarters of the Canadian Daily Newspaper Association, commenting on the general circulation picture, said the war had "very materially" increased newspaper sales.

Sees Danger To U.S.

Express Belief That Americans Still Possess Elements Of Greatness

Boston. — Commander Robert C. Lee, executive vice-president of Moore-McCormack Steamship Lines, said "there is already evidence that we are spawning a large number of a new kind of American—a youth who is afraid to fight."

"If this number is allowed to increase our doom is sealed," he told the Propeller club in a prepared address.

"I believe we still possess the elements of greatness, but the sooner we get to this fight, which is inevitably coming to us, the better," Lee said.

"The Germans believe they are fighting for 'lebensraum.' They know that the only really golden living room left in the world is the western hemisphere."

Would Rush Planes

Suggests 1,000 American Planes And Crews Be Sent To Aid Allies

New York.—Major General John F. O'Ryan, former New York police commissioner and commander of the 27th division of the American expeditionary forces during the first Great War, suggested 1,000 American planes and the crews to man them be sent immediately to aid the Allies.

General O'Ryan said he had just received a cablegram from Captain Bird, who served with him in the 27th division and who now is in London on business. Bird said the British pilots had "completely taken the wind out of the Germans" and are "knocking them down with any crate that can fly."

The "latter part" of it is, he said, that they lack sufficient planes.

Will Work Together

Parties In Exile Government To Hold Weekly Conferences

Dublin.—Prime Minister De Valera announced in the dail that in view of the dangers threatening the Eire Coggrave party and Labor party had agreed to join in a conference each week and as often as necessary on matters of national defence.

The conferees will be three members of the government party, three of the Coggrave and two of the Labor parties.

"We must all now be brothers in one holy cause," Dr. De Valera said.

WILL MOBILIZE ALL OUR RESOURCES IN WAR EFFORT

Montreal.—Hon. Norman Rogers, minister of national defence, said in a banquet address at the Canadian Legion's eighth Dominion convention that "this government in your name is determined to bring a still greater effort to this country to the aid of the Allied powers in this war."

The defence minister said "an air ministry has been created so that progress in the training of aircraft will be speeded up to the greatest possible degree."

"The department of munitions and supply had the co-operation of industry and labor in the greatest effort to speed up production that has ever been made. The department of national defence, in addition to announcing the organization of a Canadian corps in the field and the mobilization of a third division, has said that the infantry units of a fourth division will be called up."

There is hardly a man or woman in Canada "not consumed with a burning desire to work, to help, and to add to the strength that this nation must mobilize—and will mobilize—to meet the danger" of the present emergency.

He called the emergency "just as urgent and just as fatal as that which has ever occurred in our history" and added that the strain of "being in Canada, of being dependent on news that seems to be so slow in arriving and of apparently being unable to be of immediate assistance to those who are fighting so hard, is not easy to bear."

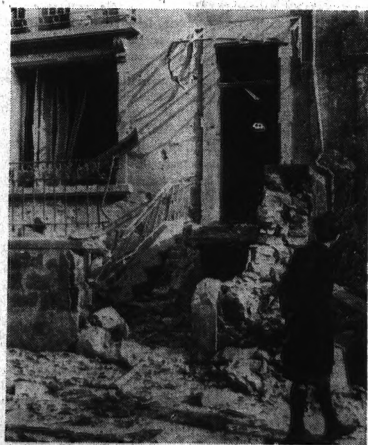

"But in spite of that, or perhaps I should say, for this very reason, the duty of everyone is clear. The qualities of unity, determination, faith and steadfastness are the qualities that are called for from us all at this hour."

Mr. Rogers, who returned only recently from a visit overseas, said men of the first Canadian division at Aldershot are bringing the qualities of "guidance and example" to the task which they have to perform. Organization is proceeding at once with the veterans' home guards and "we intend to supplement these with veterans not attached to non-permanent militia units."

The King's Birthday

Ottawa.—June 13 has been proclaimed as the date for celebration of the King's birthday, but thousands of Canadians will not participate in the holiday but continue work in war industries, many of which are now operating seven days a week.

IT WAS HOME—BEFORE NAZI BOMBERS CAME

This forlorn little French boy looks at the remains of his home in Nancy after the German bombing planes had annihilated the little town and machine-gunned hundreds of helpless women and children.

MARSHAL PETAIN

A new picture of Marshal Pétain, pioneer in mechanized fighting and hero of Verdun in the World War, who becomes vice-premier of France at the age of 84.

Delivery Of Bombers

New Plan To Facilitate Shipments From United States

Ottawa.—Flights of American-made bombing planes to Britain probably will be aided by the routing in Washington, that United States pilots may fly belligerent aircraft over the three Maritime provinces. It was stated unofficially in air circles here.

It was disclosed several days ago that bombers were making trans-Atlantic hops and this new routing by Cordell Hull, United States secretary of state, should speed delivery from the factories to the vast Newfoundland airport where the planes presumably are refueled for the ocean flight.

"The planes, however, will still have to land at the international border and be pulled across in accordance with the neutrality legislation. But American pilots will continue the flight to the eastern air bases or Newfoundland."

These pilots would be better acquainted with operations of the new bombers while Canadian airmen possibly would take a little time to learn the mechanics of the aircraft. It is understood consideration is being given to establishing some landing fields on the international border where these planes could be pulled across and then flown from the United States. Since the war started planes have come into the country at some prairie points.

Postal Information

Proper Mail Address For Men Serving With Canadian Navy

Ottawa.—The national defence department naval service said there has been much confusion on the part of the public in addressing mail and parcels for officers and men serving with the Canadian navy.

The proper way to address mail, the service said, is:

Rank and name of naval rating, c/o the Fleet Mail Office, H.M.C. Dockyard, Halifax, N.S. (east coast).

Or: H.M.C. Dockyard, Esquimaux, B.C. (west coast).

Soldiers Rescued From Sea

Hospital Ship Fished Them Up From Drifting Boat

London.—A British officer and 12 men picked up at sea from a drifting boat were brought to an English port by a hospital ship.

Hard pressed by advancing German troops and by machine-gun fire from planes attacking a French seaport, the officer and his men raced to the beach and swam ¼ of a mile to a drifting boat.

In the boat they found a Netherlands dead from machine-gun fire. To hide from the German soldiers they lay in the bottom of the boat as it drifted seaward. Machine-gun fire had disabled the motor.

CANADA'S HUGE WAR CHEST FUND IS AUTHORIZED

Ottawa.—Parliament gave the government a \$700,000,000 war chest for the fiscal year ending March 31, 1941, with authority to borrow whatever portion of that amount which cannot be raised by taxation.

After a short discussion in the House of Commons the war appropriations bill was given third reading without a dissenting voice and sent to the senate, where it was quickly put through all stages.

Mr. Justice O. S. Crockett of the supreme court of Canada, deputy of the administrator, came to the senate chamber and gave royal assent to the measure and to the interim supply bill.

An opposition amendment was defeated without a recorded vote. It was moved by Conservative Leader Hanson and asked that "a detailed accounting of sums expended under authority of this act be laid before this house within the first 15 days of the next session of parliament."

Finance Minister Ralston told the house it would be inexpedient to do the house's statement, as suggested because of the secret nature of the information which would thus be revealed. However, he would be glad to give parliament an undertaking that he would lay on the table of the house a statement of the money spent within two months of the close of the fiscal year.

The accounting, he said, would be given under general headings approved by the governor-in-council. If the house were sitting at the close of the fiscal year, then he would table the statement within the first 15 days of the next session.

Other progress was made when a bill was put through all stages giving the Canadian Air Force its own separate act. Heretofore the R.C.A.F. has existed under provisions of the Aeronautics act, which authorized the defence minister to organize and administer an air force.

The War Appropriations Act gives Mr. Ralston a blanket authority to spend up to \$700,000,000 during the current fiscal year under numerous headings all associated with operations of the armed forces and the economic war effort.

Hon. C. G. Power, minister of the new department of national defence, put through the measure which now gives the R.C.A.F. its own act and in that respect puts it in the same category as the navy and militia.

Provisions of the R.C.A.F. Act do not alter in any material way the circumstances under which it has been administered up to date and follow closely the provisions contained in the Militia and Naval acts.

Under this measure the minister was subjected to a series of questions from members wishing to have consideration given airports or suitable sites for airports in their own ridings.

Mr. Power made a blanket answer to these queries, to the effect that he was in no position at short notice, to say why one site or another was chosen. In these matters he would take the advice of his technical advisers.

Speeding-up of war industry in Canada will be facilitated by powers given the new munitions and supply department to mobilize industrial forces and acquire materials.

Hon. C. D. Howe, transport minister as well as minister of munitions and supply, was given further extraordinary powers by an order-in-council dated May 24 and since brought up in parliament by the Conservative leader, Hon. R. B. Hanson.

Effect of the new authority, the finance minister, Hon. J. L. Ralston explained, is to set up a government-owned commercial enterprise to acquire materials in case of urgency and when it is not deemed in the public interest to call for tenders.

CIVILIANS ARE EVACUATED FROM ENGLISH COAST

London.—The entire southeast coast of England became a front line in effect as women and children were ordered evacuated and belief was expressed the government would remove all civilians from the area.

Home Secretary Sir John Anderson issued a warning that "there is every prospect of early call upon the civil defence." He urged all units to keep "fully manned and in a state of readiness and efficiency," while Vice-Admiral Sir James Somerville said in a broadcast that the home forces are prepared for any German attempt at landing on British soil.

The ministry of health announced it might be necessary to broaden the areas of the east and southeast coast from which children are being moved under government orders.

As far, 39,000 children, or 61 per cent. of the total school population of 15 towns of the southeast coast, have been registered for evacuation.

The health ministry appealed for nurses—as many and as quickly as possible.

Huge billboards across Britain bore the slogan, "Go To It." They symbolized the dedication of the nation's men and materials to the mightiest task in history. The three words were from an appeal by Supply Minister Herbert Morrison for a full national war effort.

Highway crews started tearing down signposts which would be useful in directing invaders.

Power was given the government to suppress newspapers printing anti-war material.

The air ministry charged German planes had bombed hospital ships plainly marked with the Red Cross. President Sir Andrew Duncan of the board of trade told the House of Commons that every resource "must now be concentrated on immediate production of armaments."

Much industrial strength previously devoted to export trade must be diverted to munitions. He forecast rationing of materials and labor.

Householders with steel air raid shelters were ordered to assemble them at once.

Taught the "Lesson of Norway and the Low Countries," Britain searched out organizations suspected of masking Nazi activities.

If Chamberlains were being raised—8,000 German and Austrian men and women have been interned, although many of them called themselves refugees—and restrictions against aliens generally were tightened.

The number of German and Austrian men interned rose to 5,600 men and 3,200 women.

Alfred Duff Cooper, minister of information, in an address to the foreign correspondents said that the many nationalities unit to fight Hitler have behind them "something invincible, which is the soul of man, and which he cannot conquer because it is immortal."

The information minister said "these are fighting today on our side Austrians, Czechs, Poles, Norwegians, Dutchmen, yes and Belgians," and "these are forces which Hitler, united in a cause which is more than a crusade; these are forces upon which he may deliver one defeat, two defeats, defeat upon defeat, but which I believe he cannot overcome."

Five-Year Bonds Sold

Chartered Banks And Bank Of Canada Were The Purchasers

Ottawa.—Finance Minister J. L. Ralston announced the sale to chartered banks and the Bank of Canada of \$45,000,000 five-year two per cent. bonds.

The sale price of 99.375 per cent. and accrued interest and the cost to the government is 2.13 per cent. The bonds will be dated March 1, 1940, and will mature March 1, 1945. The interest on and principal of the new issue will be payable in Canadian money.

Proceeds from the sale of this issue, together with cash from the Dominion treasury, will be used for the redemption on June 1, 1940, of \$80,000,000 four-year 1½ per cent. bonds.

The new issue takes the same form as that issued last March 1 to the amount of \$40,000,000.

U.S. Warships To Europe

Washington.—Three American warships are en route to Europe to double the United States naval forces in those waters where the most American citizens and interests are 2562

McKenzie Hunter, of Calgary, is receiving old acquaintances at Coleman.

Calgary school children will not have a holiday of June 13th, the King's birthday.

A number of the main electric service poles along Victoria Street are being replaced by new ones.

A number of men were recruited in Blairmore the early part of the week for home guard duties.

An exchange says there are 6,000 instruments in the full kit of a dentist, and 5,998 of them may be found in the patient's mouth at a given moment.

A man named Anton Bourassa, described as an enemy alien, was arrested by the R. C. M. police at Calgary, found in possession of photographs of strategic C.P.R. bridges. He faces charges under the Defence of Canada Regulations. The arrest constitutes the first in the Calgary district since the Dominion became aroused to the possibility of "fifth column" activities in Canada.

WORLD'S GREATEST TRAVEL SYSTEM

Exercise of the curfew law is sure necessary in Blairmore.

A Communist has been nominated for United States presidency.

One of the finest stump speeches of all time has been: "Gentlemen, I propose to speak to you tonight...."

Announcement is made that the Banff-Jasper highway will be open to through traffic on June 15th.

Hon. Charles Dunning has been added to the Hudson Bay Co's Canadian Committee, replacing J. W. McConnell.

A girl does not necessarily lose her head when she lays it on a young man's shoulder. But he has to brush some of it off.

Since opening, on May 24th, the ladies refreshment emporium at the Greenhill hotel is becoming more and more popular.

Rev. Reinhold Arusdorf, Lethbridge Lutheran minister, died of a heart attack on Sunday while enroute by car to Acme to hold services.

The annual postmasters' convention, scheduled to be held in Lethbridge June 17, 18 and 19, has been cancelled on account of the war.

Lieutenant-Governor E. W. Hamber and Mrs. Hamber, of British Columbia, have donated \$100,000 as a gift to the Canadian government for war purposes.

Scouts of Sudbury were placed in charge of ten city depots established for the reception of old iron, motor tires, lead, toothpaste and shaving cream tubes.

Robins, sparrows and doves are reported in greatly increasing numbers throughout Canada and the States. No doubt they are getting away from Hitler's savagery.

For a summer gardening competition, two potatoes each were given Wolf Cubs of the 7th North Vancouver Scout group, to see who can grow the largest crop.

Boy Scouts were used by Jack Miner to help hand and liberate a number of wild ducks and geese in the presence of a record crowd of school children from Detroit.

The Canadian government ship-building programme, involving an expenditure of \$47,000,000, directly and indirectly affects a personnel, exclusive of supervisory and office forces, of from 10,000 to 17,000 persons.

One hundred years ago last Saturday the 1,100-ton steamship Unicorn reached Halifax, a fifteen-day voyage from the United Kingdom, and became the first ocean steamship to arrive at a Canadian port from the Old Country.

Thirty years ago, a Vancouver man advertised a book of over 400 pages, "full of good things," and "prohibited in many countries." The sports who sent in their dollars received a Bible instead of the salacious book they expected.

The Canadian government is spending \$14,000,000 on the purchase of some nine thousand motor vehicles. About three thousand of these have been delivered overseas, and the six thousand vehicles required by the first and second divisions will all be delivered overseas by July.

A petition is being circulated in Hillcrest for the removal of Joe Cardinal as game warden at large. As far as we know, Blairmore has not seen the petition, and local folk figure that Cardinal is an excellent official; but it is perhaps possible for an official to become too officious.

The annual convention of the Alberta Elks' Association opens in Red Deer on Monday next, with J. P. Ferguson, of Trochu, grand lecturing knight, presiding in place of J. F. McDonald, grand exalted ruler, of Pin Flon, who will be unable to attend. The convention starts out with a big parade of Elks and citizens, headed by the Ponoka Elks' bugle band. On Tuesday evening there will be a banquet at 7, followed by a dance.

Local and General Items

The Editor will be glad to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, showers, presentations, anniversaries, etc. Please items in to 11 or hand them in at The Enterprise office not later than Thursday evenings.

Rev. Roy Taylor has been given a church in the Peace River district.

Dan Boyle succeeds L. Cuthbert as Macleod Stampede Association president.

A new automobile record was recently made. A tourist drove from coast to coast without eating a single hot dog.

A man lifts his hat in front of a certain store to honor the proprietor who sold him a quantity of hair restorer that didn't fit.

Mickey MacKay, well-known Calgary hockey star, was killed in an automobile accident near Nelson on Thursday night last.

G. C. Miller, principal of the Pincher Creek high school for the past four years, recently graduated in arts from Alberta University.

The recent fire in the old Empire hotel building at Macleod was caused by firecrackers igniting sawdust by the side of the building.

Antoine Bourque, of the Hanna district, was sentenced to two and a half years imprisonment with hard labor on a charge of attempted extortion.

Last week end a tramp approached a Scotchman for a hand-out to buy a meal. He was handed a two-bit piece which was worn so thin he threw it away.

Constable Harry Gilbert Rapee, 41, was fatally injured in an accident at the R.C.M.P. barracks at Regina, when a team of horses became frightened and he was thrown.

The prize list of the Crows' Nest Pass Golf Association, as appeared in the Fernie Free Press last week, wound up with "Three-Star Royal Canadian Whiskey." Wonder who got that most coveted of all prizes?

J. W. McDonald, K.C., of Macleod, has been appointed a judge of the district court for the district of Southern Alberta, and also a local judge of the Supreme Court of Alberta, it was announced from Ottawa on Friday last.

The new by-product coke plant recently completed by the Crows' Nest Pass Coal Company at Michel will carbonize 42,000 tons of coal annually and produce from this large tonnage of coal superior grades of coke suitable for domestic, metallurgical and foundry use.

Up to May 31st, the Alberta Division of the Canadian Red Cross shipped 312 cases containing 99,628 articles of war supplies and 3,976 articles for Polish and Finnish relief, together with 75,924 surgical dressings for sterilization, to Montreal and Toronto, to be forwarded overseas.

The memory of Albert, King of the Belgians in the last war, has been cruelly dishonored by his son, King Leopold, but the Belgian people will rally a new army and carry on the torch of King Albert, which King Leopold so shamelessly threw down when he bowed to the will of history's greatest murderer—Drumheller Review.

At the Associated Boards of Trade convention held in Fernie last week, an important resolution was passed to the following effect, that "Advancing the theory that people continually request the government for funds for highway construction and public works, but rarely brought forward means of raising money, the Creston Board of Trade introduced a resolution proposing that the gasoline tax should be increased three cents a gallon, with the complete extra tax to be definitely earmarked for highway construction. It was believed improved roads would warrant the extra tax."

Thursday next will be observed as the King's birthday.

Judge J. W. McDonald, of Macleod, succeeds Judge E. P. McNell at Calgary.

Joe Guarascio, of Kimberley, has leased the Waldorf hotel at Fernie from Sid Knight.

Some local sport fans claim that Joe McDougall is still somewhere up in the air looking for that May 26th baseball.

Advance fishing news: A young man got a fish hook embedded in his hand on May 31st, and had to go to hospital.

Ford's 28-millionth car has been on exhibition in Alberta the past week. The car came into Canada over the Logan Pass highway.

Women used to discard shoes with the toes out as not fit to wear. Now they buy them. Surely the ways of women are past finding out.—Redcliff Review.

Canada's chief press censor draws down fifteen bucks a day. He could do almost as well on an Alberta commission, with two thousand bucks on the side.

Betty Jacobson was crowned Queen of the May at Jasper on May 24th, succeeding Betty Sturgeon. Dr. O'Hagen had the honor of being Betty's escort, and delivered the Empire Day address.

"Brick" Bell, for some months employed with the Upton Tailoring and Cleaning shop, has accepted a position as butcher with the West End Meat Market at Coleman, succeeding Frank Kilgannon, moved to the coast.

Robert Peter, two-year-old son of Mr. and Mrs. Louis Lord, passed away on Sunday morning, following an illness of about two weeks. Interment was made in the Catholic cemetery on Tuesday afternoon, following service at St. Anne's church.

Okotoks has formed a home defence unit, with J. A. Sparrow, commander; C. W. Stagg, assistant commander; E. Miller, N. Dorsey, A. Barker and F. Sinclair Smith, platoon commanders; M. H. Waldron, secretary; J. H. McNeil, quartermaster in charge of stores; Dr. Ardiel, M.H.O., and Mayor-Editor Hodson, honorary unit commander.

Ed. Duthie, well known citizen of Fernie for a great number of years, and in the past few years in charge of the government vendor store there, has volunteered for active service again. Ed. is a veteran of the first Great War, serving nearly four years in France. He went over with the 54th, later being transferred to a mortar battery, in which he served as a non-commissioned officer.

Automatic renewal of the agreement between the Alberta and Dominion governments for policing Alberta by the Royal Canadian Mounted police was carried out on June 1st. Neither party had given the required one year's notice to terminate the agreement, so it continues, the province paying the Dominion \$275,000 a year. The amount was ratified at the last session of the Alberta legislature.

Strong condemnation of statements reported to have been made by Premier Aberhart at a public meeting in Winnipeg last Wednesday (May 29) was expressed at a meeting of the Canadian Corps Association in Edmonton on Tuesday night. Mr. Aberhart was reported to have said that there would be an internal rebellion or that if democracy did not do something to solve its problems. Copies of a resolution condemning the statements were sent to the lieutenant-governor of Alberta and the minister of justice at Ottawa.

Fernie is to play at Coleman Pucksters on Sunday afternoon.

The Alberta government will build a new telephone exchange in Pincher Creek.

A total of 16,643 enemy aliens, male and female, are registered in Canada.

MOTORCYCLE WANTED — Price must be low. Apply to G. Hewson, Cowley, Alberta. [M81-3]

A dance under auspices of the West Canadian Collieries' Band will be held tonight in the I.O.O.F. hall at Bellevue.

Hon. E. M. Macdonald, P.C., K.C., former minister of national defence, died at Pictou, Nova Scotia, on May 25th, in his 75th year.

Pincher Creek has formed a Loyal Citizens of Canada group, with R. O. Allison as president, Corbet Lynch-Staunton as vice-president and Chas. Carswell as secretary.

Canadian factories have delivered up to May 20th 400,000 blankets, 125,000 pairs of boots, 270,000 shirts, 775,000 pairs of socks, 155,000 uniform blouses and jackets, and 190,000 uniform trousers.

Eight Canadian plants are at present engaged in the manufacture of 2,250,000 shells, while orders for a like amount are being sent out. Canadian plants will later be engaged in producing 4,500,000 shells.

A faithful fisherman's luck: Lose your watch and go back the next day and find it. We have also known fishermen to miss a good fish on Sunday, and go back Monday morning and get it quickly. Oh, to be a fisherman!

Canadian employers are charged with "falling down on their job" in connection with the country's war effort by Howard B. Chase, of Ottawa, member of the war purchasing board. "There is a tendency among our employing classes to lengthen hours of work for war production rather than take on more labor," declared Mr. Chase. He said employers should take on as many men as possible and train them.

Rev. J. W. Smith, former pastor of Central United church, Blairmore, and for the past eight years pastor of Highlands United church, leaves Edmonton this week for Vancouver to take over the pastorate of the Collingwood United.

Miss S. Duff, of Toronto, a graduate of the University of Alberta law school and well known in Alberta legal circles, died recently. She was admitted to the Alberta bar in 1923, the second woman to achieve this distinction. She for a time operated a law office at Barnhead under the name of Patterson and Duff. She left there for the east in 1923.
